AI · SOFTWARE ENGINEERING · FINTECH · HANDS-ON BUILDER

Hands-on engineering leader with 15+ years in regulated fintech environments. Builds and deploys production-grade AI agents, automation pipelines and multi-agent systems end-to-end — from prompt design to cross-functional rollout. Proven track record driving company-wide AI adoption with measurable ROI, while scaling engineering organisations of up to 50 people. Equally at home writing code (especially Elixir) using Claude agents, drafting roadmaps and presenting strategy to executives.

PROFESSIONAL EXPERIENCE

Wonderful

Jan 2026 – Mar 2026

Field CTO — Enterprise AI Platform

- Drove client delivery and presales for an enterprise AI platform, translating complex AI capabilities into clear business value for Swiss enterprise prospects.
- Led technical demonstrations showcasing AI agent workflows, automation pipelines and integration patterns to C-level and technical audiences.
- Leveraged a strong professional network across Romandie to open strategic AI adoption discussions with key Swiss companies.
- Bridged the gap between client automation needs and product capabilities, scoping custom agent deployments and integration architectures.

Scrypt

Nov 2025 – Dec 2025

Head of Engineering

- Led engineering strategy and operations, delivering high-impact organisational and technical changes within a focused tenure.
- Defined and delivered the complete product and engineering roadmap; introduced Linear as the company-wide project management platform, bringing structure and visibility across all teams.
- Drove company-wide AI adoption by deploying Claude Enterprise as a multi-agent system integrated via Slack with Linear, email and calendars — creating always-on AI agents that help the executive team and all employees navigate cross-functional dependencies across tech, sales and marketing.
- Trained engineering teams on Claude Code for AI-assisted development, accelerating adoption of agentic coding workflows across the organisation.

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Ripple Custody

- Led an international engineering organisation of up to 50 engineers across Geneva and San Francisco, building a regulated institutional custody platform spanning mobile, web and backend systems.
- Partnered with Product, Sales and Field Engineers to translate business goals into an executable technical roadmap, balancing feature velocity with platform reliability and security.
- Operated as a manager of managers: restructured engineering into autonomous squads with clear domain ownership, breaking silos and increasing cross-functional delivery velocity.
- Led the tokenisation initiative for banking-grade institutional clients, enabling compliant digital asset issuance and management on the platform.
- Achieved 96% team satisfaction scores through structured coaching, transparent OKRs and a culture of ownership.

AI & AGENTS

LLM & GENAI

Claude Code
Local LLMs Jido
Multi-agent orchestration
Voice AI (STT, LLM, TTS)

EDUCATION

MSc Informatics & Networking

Bazzile Technology SA	Aug 2020 – Present	EIGSI La Rochelle, 2009
CTO / CPO – Partner		
– Hands-on technical founder of a mobile-first consumer product in real estate. Personally architected and built the full stack — Elixir/Phoenix backend, Flutter cross-platform mobile app, cloud infrastructure — following TDD principles. – Built the backend with Elixir/Phoenix — fault-tolerant, concurrent services delivering REST APIs with real-time event capabilities to mobile and web clients. – Designed and implemented AI agents using Jido, an Elixir-native agent framework — orchestrating autonomous workflows for data processing and intelligent automation within the platform. – Introduced AI-assisted development practices with Claude Code — automated code review with CodeRabbit — accelerating delivery velocity by ~100% and reducing manual engineering overhead. – Drove reliability engineering to achieve 99.95%+ platform uptime; owned the product roadmap end-to-end from user research to iterative delivery.		
OTHER EXPERIENCES		
FlowBank SA <i>Global Head of Technology — Executive Director</i>	Aug 2022 – Aug 2023	
Union Bancaire Privée <i>Internal Auditor</i>	2018 – 2020	
Banque de Commerce et de Placements <i>Software Engineer</i>	Nov 2017 – Oct 2018	
SIX Swiss Exchange <i>Scala Developer</i>	Feb 2017 – Oct 2017	
Glencore <i>Software Engineer</i>	Aug 2016 – Jan 2017	
Swissquote <i>Technical Lead</i>	Jan 2016 – Jul 2016	
Rolex SA <i>Software Engineer</i>	Jan 2011 – Dec 2015	
Axway <i>Software Engineer</i>	Jan 2009 – Dec 2010
