HANDS-ON BUILDER · AGENTS IN PRODUCTION · BUY / WIRE / BUILD · FOUNDER-ADJACENT OPERATOR

Startup builder and operator: cofounded a real estate SaaS and scaled engineering after starting alone — still coding daily in production. Hands-on every day with agentic engineering and AI-assisted coding, shipping agents that get used in real estate and banking. French & English speaker, comfortable next to founders and ExCos.

PROFESSIONAL EXPERIENCE

Wonderful

Jan 2026 – Mar 2026

Field CTO — Enterprise AI Platform

- Owned the full pre-sales loop: prospecting, demo, prototype, deployment plan — turning the agentic AI platform into a working thing in client hands, not a deck.
- Built tailored demos and prototypes for Swiss enterprise prospects (banking, industry, public sector), wiring agentic workflows, RAG and model orchestration to their own data.
- Translated each prospect's day-to-day pain into a concrete agent use-case.
- Drove first enterprise clients end-to-end — deploy, train, measure — until agents were used daily, not parked in a sandbox.

Script

Nov 2025 – Dec 2025

Head of Engineering — Company-Wide AI Adoption

- Deployed Claude Enterprise across the whole company, wired into Slack, Linear, email and calendars — a single always-on agent that the ExCo, sales, marketing and engineering use every day to unblock cross-functional work.
- Trained all the teams one by one to move people from deeply slow manual tasks to enhanced coworkers.
- Coached engineers hands-on on Claude Code (CLI, skills, memory, MCP) so agentic development became the default, with a first successful delivery in production.

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Digital Asset Custody

- Drove AI adoption across an org of up to 50 engineers across Geneva and San Francisco: code review, test generation, agent-driven refactoring with Claude Code and Augment — measured, iterated, kept what worked.
- Shipped a regulated custody platform live with HSBC Hong Kong; reported delivery, risk and AI posture to senior leadership and external regulated partners.
- Built the squad model, OKRs and hiring strategy; sustained 90–96% team satisfaction through coaching, autonomy and honest change management.

Bazzile Technology SA

Aug 2020 – Present

Founder & CPTO — Solo-Built SaaS

- Founded and carried the product alone first, then hired 2 more engineers and one technical success officer.
- Owned everything end-to-end: Elixir backend, Flutter mobile, infrastructure and product roadmap.
- Rewired internal ops with AI tools as soon as they shipped: Claude Code in dev, n8n for recurring support tasks, and Jido for the in-app voice real estate agent.

Global Head of Technology — Executive Director

- Joined as Strategic Technology Consultant to the ExCo, then took over the full IT department (~40 people) — direct working relationship with CEO, COO and board, no layers in between.
- Killed the projects that did not earn their keep, scaled the ones that did; transformed a classical bank into a fully digital, crypto-enabled institution.
- Initiated the on-prem to AWS migration and built a real-time data platform connecting trading, compliance, marketing and finance — the substrate for later automation and agents.

OTHER EXPERIENCES

Union Bancaire Privée	Internal Auditor — IT & Banking Security	Nov 2018 – Jul 2020
Banque de Commerce et de Placements	Software Engineer	Nov 2017 – Oct 2018
SIX Swiss Exchange	Scala Developer	Feb 2017 – Oct 2017
Glencore	Software Engineer	Aug 2016 – Jan 2017
Swissquote	Technical Lead	Jan 2016 – Jul 2016
Rolex SA	Software Engineer	Jan 2011 – Dec 2015
Axway	Software Engineer	Jan 2009 – Dec 2010
