AGENTIC SOFTWARE ENGINEERING · MULTI-AGENT ARCHITECTURES · REGULATED SWISS ENVIRONMENTS · AI ADVISORY

Senior technology leader with 15+ years in software engineering and a decade inside regulated Swiss financial institutions. Hands-on architect of agentic development environments — Claude Code, MCP, multi-agent workflows — with the consulting posture to advise CIOs, upskill teams and deliver measurable ROI. Fluent in production code, FINMA/LPD constraints and C-suite conversation.

PROFESSIONAL EXPERIENCE

Wonderful

Jan 2026 – Mar 2026

Field CTO — Enterprise AI Platform

- Drove client delivery and led presales engagements with enterprise prospects across Switzerland for an on-premise and sovereign-friendly enterprise AI platform.
- Ran technical demonstrations for Swiss enterprise clients, translating complex AI platform capabilities (agentic workflows, RAG, model orchestration) into clear business value.
- Activated a strong professional network across Romandie to open strategic discussions with key Swiss banking, industrial and public-sector companies.
- Bridged client needs and product capabilities, shaping deployment patterns for data-sensitive and regulated environments.

Script

Nov 2025 – Dec 2025

Head of Engineering — AI Adoption & Agentic Workflows

- Drove company-wide AI adoption by deploying Claude Enterprise, integrated via Slack with Linear, email and calendars — creating an always-on agent that helps the ExCo and all employees navigate cross-functional dependencies across tech, sales and marketing.
- Designed a context-engineering playbook for the engineering team: proprietary skill libraries, memory management and MCP-based integration to internal systems.
- Trained the engineering team hands-on on Claude Code — CLI usage, skill authoring, memory and MCP-backed workflows — embedding agentic development as a daily practice across the squad.
- Defined and delivered the complete product and engineering roadmap; introduced Linear as the company-wide project management platform, bringing structure and visibility across all teams.
- Reorganised the tech organisation around delivery and L3 support squads, improving focus and accountability within a focused tenure.

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Blockchain Custody Platform

- Led an organisation of up to 50 engineers across Geneva and San Francisco delivering a regulated digital asset custody platform for institutional banking clients, including HSBC Hong Kong.
- Introduced AI-assisted development practices (code review, test generation, documentation, agent-driven refactoring) with Claude Code and Augment.
- Designed the squad model, OKR framework and hiring strategy; achieved 90–96% team satisfaction scores through coaching and autonomy.
- Reported technology strategy, delivery progress and risk posture to senior leadership and external regulated partners.

Global Head of Technology — Executive Director

- Led the full IT department (~40 people) of a FINMA-regulated Swiss bank, transforming it into a fully digital institution — from classical banking services to crypto-enabled products.
- Prepared the technology roadmap and budget for the Executive Committee; previously joined as Strategic Technology Consultant (May–Jul 2022) advising the ExCo on technology direction.
- Initiated the on-premise to AWS migration; designed the target architecture enabling the quantitative team to build data-driven services on a real-time data platform connecting trading, compliance, marketing and finance.
- Defined the DevSecOps and delivery strategy, embedding security and auditability into the engineering culture.

Union Bancaire Privée

Nov 2018 – Jul 2020

Internal Auditor — IT & Banking Security

- Led IT and banking security audits across the bank's digital estate, ensuring FINMA and GDPR compliance; reported directly to top management on risk and strategic actions.
- Built tooling and leveraged data analytics (R, Tableau) to increase audit team coverage and credibility; uncovered a critical identity-access management bug affecting 0.5% of bank users.
- Led a team of two security specialists performing risk analysis and mission planning across the bank's IT landscape.

OTHER EXPERIENCES

Bazzile Technology SA	Chief Product & Technology Officer	Aug 2020 – Present
Banque de Commerce et de Placements	Software Engineer	Nov 2017 – Oct 2018
