Thibault Fouache

CTO & Partner @ Bazzile

Geneva, Geneva, Switzerland

Summary

Highly analytical and technically astute leader directing all facets of IT operations and full software development cycle from inception to completion within agreed time and budget by catalysing effective results within IT sector. Expert in partnering with stakeholders, leadership teams, and vendors to analyse needs/issues, achieve consensus on strategies, and implement technologies as well as best practices to deliver consistent, repeatable, and high-quality services. Demonstrated skills to emphasis on introducing key technology solutions to meet the changing needs of clients and dynamic business environment. Proven ability to comprehend industry best practices and collaborate with strategic partners and leadership teams to align capabilities and influence strategic roadmap. Sound knowledge of design validation, verification, cloud computing, data science, and IT frameworks. Articulate communicator fluently speaks the language of both people and technology, blending technical expertise with interpersonal skills, while interacting all levels of management and stakeholders.

Experience

Wonderful

Field CTO, Switzerland

January 2026 - Present (3 months)

Zurich, Switzerland

Responsible for driving client delivery and leading presales engagements with enterprise prospects across Switzerland.

Lead technical demonstrations and presales for Swiss enterprise clients, translating complex AI platform capabilities into clear business value

Leverage a strong professional network across Romandie to open strategic discussions with key Swiss companies

Bridge the gap between client needs and product capabilities, ensuring successful delivery outcomes

Bazzile Technology SA

5 years 8 months

Chief Product & Technology Officer - Partner

August 2022 - Present (3 years 8 months)

Geneva, Switzerland

Lead a team of 3 developers to carry on the next stages of Bazzile's development.

Chief Product & Technology Officer

August 2020 - July 2022 (2 years)

Geneva, Switzerland

Planned and developed efficient mobile application regarding Real Estate to attract and bring new customers. Formulated and applied creative strategies for company, ensuring smooth progression of operational activities. Led and over full stack development from database to mobile through utilisation and following Agile/Scrum Test Driven Development principles and methodologies to meet and exceed business objectives.

- Carried out new version of application backend and mobile application (React Native, React and Elixir).
- Selected and managed the cloud infrastructure.
- Planned the Cyber Security risk assessment and mitigations.
- Managed a team of two software engineers.
- Played key role in overseeing and making different providers rapidly available for addressing CEO's needs as required.

SCRYPT

Head of Engineering

November 2025 - December 2025 (2 months)

Zurich, Switzerland

Led engineering strategy and operations, delivering high-impact organizational and technical changes within a focused tenure.

Key contributions:

Defined and delivered the complete product and engineering roadmap

Introduced Linear as the company-wide project management platform, bringing structure and visibility across all teams

Reorganized the tech organization around delivery and support squads (L3), improving focus and accountability

Drove company-wide AI adoption by implementing Claude Enterprise, integrated via Slack with Linear, email, and calendars — creating an always-on

AI agent that helps the executive committee and all employees navigate cross-functional dependencies across tech, sales, and marketing

Ripple

Director Software Engineering

September 2023 - October 2025 (2 years 2 months)

Geneva, Switzerland

In my role as the Director of Software Engineering at Ripple in Geneva, Switzerland, I led a team of up to 50 professionals in developing a Blockchain custody solution. I focused on driving hiring efforts, implementing effective people management strategies, and providing career coaching to support the team's growth and success.

- Maintaining very close key clients relationship in order to help delivering specific use cases.
- Achieved 90% of team adhesion to management.
- Launched and organized multiple teams into squads to break silos.

FlowBank

1 year 4 months

Global Head of Technology - Executive Director

August 2022 - August 2023 (1 year 1 month)

Geneva, Switzerland

Lead the whole IT department to bring a viable vision that will transform the Bank to a fully digital institution. This Neo bank has strong ambitions from classical banking services to crypto enabled products. Empower developers and site reliability engineers with mentorship by bringing software craftsmanship and devops principles.

- Initiated and leaded the transition from on premise to AWS.
- Created the new target architecture to enable the quantitative team to create data driven services.
- Prepared the roadmap and budget for the Executive Committee.
- Leded the technology department (~40 people).
- Defined the development strategy and bring the DevOps culture to the department.
- Initiated and lead new core projects like CRM and Core Banking.
- Created the new target architecture to enable the quantitative team to create data driven services.

Strategic Technology Consultant

May 2022 - July 2022 (3 months)

Geneva, Switzerland

Provided advice to Executive Committee to the new Technology direction the Bank should follow.

CREA - OMNES Education

Information Technology Lecturer - ReactJS Instructor

January 2021 - June 2022 (1 year 6 months)

Geneva, Switzerland

As an Information Technology Lecturer and ReactJS Instructor at CREA - OMNES Education in Geneva, I led the development and delivery of React courses for Web & App Development Bachelor students. By collaborating with industry professionals, I ensured the curriculum's relevance and real-world application. Implementing innovative teaching methods, I enhanced student engagement and learning outcomes.

Pictet Asset Management

Site Reliability Engineer - Contractor

May 2021 - December 2021 (8 months)

Geneva, Switzerland

Applied my DevOps skills to technically lead the implementation of an End User Computing solution.

- Led a team of two Site Reliability Engineers.
- Created EKS cluster on a security constrained environment.
- Created Helm charts for a common structure of deployments.
- Used Infrastructure as Code methods thanks to Terraform.
- Provided React trainings internally.

UBP - Union Bancaire Privée

Internal Auditor

November 2018 - July 2020 (1 year 9 months)

Genève, Canton de Genève, Suisse

Headed and oversaw routine IT and Banking Security audits for eliminating potential risks and errors in adherence with GDPR audit compliance. Directly reported to top management and leadership teams to discuss business current and future business technical affairs and strategic actions in timely manners. Utilised data analytics tools and technologies in R/Tableau Software to support company in enabling raw data into understandable format.

- Devised and implemented technology tooling for increasing team credibility.
- Played a key role in carrying out risk analysis and mission planning.
- Uncovered bug that affected 0.5% bank users in application roles through proper identity access management audit.

- Lead a team of 2 security specialists to perform various assessments on the bank's IT landscape.

BCP Banque de Commerce et de Placements

Software Engineer

November 2017 - October 2018 (1 year)

Région de Genève, Suisse

Managed a team of developers and aligned all development stack for smooth running of operational activities.

Setup development infrastructure pipeline and rendered technical solutions by analyzing information needs, flows, data usages, and processes. Investigated problematic areas by directing full software development lifecycle from concept to execution for reviewing operational feasibility.

- Building a commodity trade finance tooling for the bank with a team of 2 offshore developers in Vietnam.
- Implemented DevOps mindset by adding the agile methodology to development and creating a full CI/CD tooling (Kubernetes, Docker, Gitlab with pipelines).

SIX

Scala Developer - Contractor

February 2017 - October 2017 (9 months)

Région de Genève, Suisse

Scala development for the api regarding the registration of structured products in the SIX portal.

- Build REST services for stocks and structured products information for the new SIX website on Play in Scala.
- Usage of Slick for database queries.
- Functional programming style.

Glencore

Software Engineer

August 2016 - January 2017 (6 months)

Baar, Canton de Zoug, Suisse

Entered in the field of commodity trading field by learning from various traders with a broad range of commodities. Applied the best practices of software development with Test Driven Development and Scrum.

- Participate in the rewrite of the commodity trade system of Glencore by capturing the need directly from the traders and bringing technical expertise for architecture.

- Created and integrated front-end build system in existing java one, building new web applications with Spring boot/Angular 2 stack and through deployment on JBOSS EAP servers. Migrated Forex application to novel servers/standards.

Swissquote

Technical Lead

January 2016 - July 2016 (7 months)

Lausanne Area, Switzerland

Designed architecture towards new project that permits company customers to implement Forex algorithms on bank's servers. Led and oversaw offshore teams on various Forex projects to achieve business objectives and offer expertise on front-end technologies.

- Established Proof of concepts (POF), including NodeJS, Scala, and Python as well as real implementation.
- Technically lead 4 teams of 10 remote Ukrainians developers by providing technical expertise and code reviews.
- Create team building activities to strengthen work relationships.

Rolex

Software Engineer

January 2011 - December 2015 (5 years)

Developed and retained internal applications towards after-sales/advertising sectors. Hired for managing web stack for selecting front-end frameworks and asset management regarding Java/HTML projects. Established and controlled software factories consisting of Nexus, Bamboo, and Maven) towards development teams in Rolex, while converting angular/Karma use across different teams. Administered Identity Management project through interaction with multiple teams of Web development and Infrastructure. Identified user needs and wrote down business/ technical specifications as per requirements.

- Built and maintain internal applications for after-sales and advertising sectors.
- Responsible of web stack for the team: choice of front-end frameworks, asset management for HTML/Java projects.
- Creation and administration of the software factory (Bamboo, Nexus, Maven) for all development teams within Rolex.
- Evangelized the use of angular and Karma within different team.
- Managed an IDM (Identity Management) project with multiple teams: Web development and infrastructure (LDAP and OIM).

- Capture user needs and write down business and technical specifications.

Axway

Software Engineer

January 2009 - December 2010 (2 years)

Paris Area, France

Established SEPA banking application and selected full-stack development technologies comprising Java, Flex 4, Spring, and Maven, while performing as tech lead. Supervised different projects for the American market across multi-cultural team that located in India, USA, and France. Explored training needs of staff and delivered coaching with primary focus of performance improvement.

- Acted as technical leader and bring continuous integration (CI) philosophy to the team, such as Build tool/ server.
- Revamped Agile behaviour of team by bringing pair programming.
