

Technology leader with 15+ years across regulated finance, trading and software delivery, including direct commodity trading and commodity trade finance exposure at Glencore and Banque de Commerce et de Placements. Led IT and engineering organisations up to 50 people, owned strategic roadmaps and Executive Committee reporting, and delivered systems for compliance, finance, trading, custody, audit and operational stakeholders. Combines hands-on architecture depth with C-level stakeholder management, Agile delivery and pragmatic AI automation.

PROFESSIONAL EXPERIENCE

Ripple

Sep 2023 - Oct 2025

Director of Software Engineering - Institutional Digital Asset Custody

- Led an organisation of up to 50 engineers across Geneva and San Francisco delivering a regulated custody platform for institutional financial clients.
- Owned delivery structure, hiring, levelling and squad organisation; reported progress, risks and delivery commitments to senior leadership and key clients.
- Created dedicated support and delivery workstreams to separate incidents and L3 requests from roadmap delivery while maintaining high team engagement.

FlowBank SA

May 2022 - Aug 2023

Strategic Technology Consultant, then Global Head of Technology - Executive Director

- Led the full IT department of a FINMA-regulated digital bank, covering software engineering, data, infrastructure, service delivery and outsourced providers.
- Prepared technology strategy, annual budget and roadmap for the Executive Committee; balanced regulatory, operational and business-value priorities.
- Initiated Core Banking, CRM, AWS migration and real-time data platform programmes connecting trading, compliance, finance and marketing flows.

Union Bancaire Privée

Nov 2018 - Jul 2020

Internal Auditor - IT & Security

- Headed IT and security audits across the bank's application and infrastructure landscape, reporting risk posture and remediation plans to top management.
- Planned audit missions, coordinated two security specialists and translated technical findings into actionable controls for business and IT stakeholders.
- Built R and Tableau analytics to improve control coverage and uncovered a critical IAM defect affecting 0.5% of users.

Banque de Commerce et de Placements

Nov 2017 - Oct 2018

Software Engineer / Technical Lead - Commodity Trade Finance

- Built commodity trade finance tooling with a small distributed team, translating financing, workflow and operational needs into delivered software.
- Introduced Agile delivery and CI/CD practices with Kubernetes, Docker and GitLab pipelines to improve quality, maintainability and release discipline.

Glencore International AG

Aug 2016 - Jan 2017

Software Engineer - Commodity Trading Systems

- Joined a commodity trading environment and worked directly with traders across a broad range of commodities to capture requirements and shape system architecture.
- Participated in the rewrite of Glencore's commodity trade system using Scrum, TDD and modern Java / Angular delivery practices.
