Application: Director — Technology Consulting — Geneva Hub Lead (Ref. 1660864)

Dear Hiring Team,

The combination of business development, people leadership and technology delivery within Financial Services that defines this role is a rare match for my career trajectory — and exactly the challenge I am looking for.

Over the past 15 years, I have worked exclusively with Swiss financial institutions — banks, wealth managers and regulated fintech firms — in increasingly senior technology leadership positions. As Global Head of Technology at FlowBank, a FINMA-regulated digital bank, I led a department of 40 people, defined the IT strategy and annual budget presented to the Executive Committee, architected a real-time data platform connecting trading systems to compliance and finance, and initiated the cloud migration to AWS. At Union Bancaire Privée, I conducted IT and security audits that gave me a deep understanding of regulatory compliance from the inside. At Ripple, I directed an organisation of 50 engineers delivering a regulated institutional custody platform for banks and asset managers, building the delivery and governance structures needed to operate at that scale.

Most recently, as Field CTO at Wonderful, I moved to a client-facing role — driving presales and business development for an enterprise AI platform. I ran technical demonstrations of AI agent workflows and automation pipelines for C-level audiences at Swiss banks and asset managers, and leveraged my professional network across Romandie to open strategic conversations with key financial institutions. This experience sharpened my ability to translate technology capabilities into business value — the core of what EY's Technology Consulting practice delivers to its clients.

I bring the local network, the Financial Services domain expertise, and the hands-on technology depth — from data platforms and AI to core banking and cloud architecture — that this role demands. I would welcome the opportunity to discuss how I can contribute to the growth of EY's Geneva hub.

Yours sincerely,

Thibault Fouache
