FOUNDER · APPLIED AI ENGINEERING · AGENT DEPLOYMENT · ENTERPRISE DELIVERY

Co-founder turned applied-AI engineer. Built a real-estate technology startup from zero to production with paying users and a live voice agent in the product. Recent track record deploying enterprise AI inside Swiss financial and industrial groups — agentic workflows, RAG, MCP-backed integrations — and scaling a 50-engineer organisation at Ripple. Codes daily in Go, Elixir, Rust and TypeScript. Equally comfortable framing a CEO conversation and creating a new feature.

PROFESSIONAL EXPERIENCE

Wonderful

Jan 2026 – Mar 2026

Field CTO — Enterprise AI Platform

- Owned client delivery and presales for an on-premise enterprise AI platform — directly mirroring the deploy-our-models-inside-the-enterprise mission.
- Ran technical demonstrations and architecture workshops with Swiss banking, industrial and public-sector clients, translating agentic workflows, RAG and model orchestration into concrete business value and ROI.
- Activated a strong network across Romandie to open strategic discussions with C-level decision makers and shape adoption roadmaps.
- Bridged client needs and product capabilities, shaping integration patterns for data-sensitive and regulated environments.

Bazzile Technology SA

Aug 2020 – Present

Co-Founder, CTO / CPO — Partner

Co-founded and built a real-estate technology startup from zero to production. Real users, real constraints, still running. Owned engineering and product end-to-end with a small team, an open-source stack and a ship-weekly cadence.

- Built the product hands-on: Elixir/Phoenix backend, Flutter mobile, PostgreSQL, infrastructure on Hetzner with container-based deployments via Kamal.
- Shipped a user-facing voice agent inside the product to help end-users find a home — done using Wonderful, currently in rewrite with Jido and Voxtral.
- Sustained 99.95% uptime through reliability engineering, observability and incident practices installed from day one.
- Ran product discovery directly with users, shaped commercial conversations, and recruited and coached a tight engineering unit optimised for ownership and customer impact.

Script

Nov 2025 – Dec 2025

Head of Engineering — AI Adoption & Agentic Workflows

- Drove company-wide AI adoption by deploying Claude Enterprise, integrated via Slack with Linear, email and calendars — an always-on agent helping the ExCo and all employees navigate cross-functional dependencies.
- Designed a context-engineering playbook for the engineering team: proprietary skill libraries, memory management and MCP-based integrations into internal systems.
- Trained the engineering team hands-on on Claude Code — CLI usage, skill authoring, memory and MCP-backed workflows — embedding agentic development as daily practice.
- Reorganised the tech organisation around delivery and L3 support squads and delivered the full product and engineering roadmap inside a focused tenure.

Director of Software Engineering — Blockchain Custody Platform

- Led an organisation of up to 50 engineers across Geneva and San Francisco delivering a regulated digital-asset custody platform for institutional banking clients, including HSBC Hong Kong.
- Introduced AI-assisted development practices — code review, test generation, documentation and agent-driven refactoring — with Claude Code and Augment, raising engineering throughput across the org.
- Manager of managers: restructured into autonomous squads, owned hiring end-to-end, achieved 96% team satisfaction through coaching, transparent goals and ownership culture.
- Acted as technical voice with regulators and enterprise customers — bridging product, risk and engineering perspectives at the executive table.

OTHER EXPERIENCES

FlowBank SA	Global Head of Technology — Executive Director	Aug 2022 – Aug 2023
Pictet Asset Management	Site Reliability Engineer — Kubernetes, Terraform	May 2021 – Dec 2021
Union Bancaire Privée	Internal Auditor — IT & Banking Security	Nov 2018 – Jul 2020
Banque de Commerce et de Placements	Technical Leader — Java, Kubernetes	Nov 2017 – Oct 2018
SIX Swiss Exchange	Scala Developer — Structured Products	Feb 2017 – Oct 2017
Glencore	Software Engineer — Commodity trading	Aug 2016 – Jan 2017
Swissquote	Technical Lead — Forex, Algo Trading	Jan 2016 – Jul 2016
Rolux SA	Software Engineer — Architecture	Jan 2011 – Dec 2015
Axway	Software Engineer — Medical & Banking	Jan 2009 – Dec 2010

MSc Informatics & Networking

EIGSI La Rochelle, 2009

Ethereum Blockstars

B9lab Certification, 2019
