

Senior technology executive with 15+ years in Swiss financial services, including CTO and Global Head of Technology roles at FINMA-regulated institutions. Proven track record building and scaling nearshore engineering teams — designed and stood up a nearshore delivery centre in Portugal, growing it into an integrated extension of the Swiss engineering function. Deep expertise across core banking systems, digital channels, cloud migration, and regulatory compliance. Equally effective presenting technology strategy to the Board and leading distributed engineering organisations across multiple countries.

PROFESSIONAL EXPERIENCE

FlowBank SA

Aug 2022 – Aug 2023

Global Head of Technology — Executive Director

Full accountability for technology strategy, delivery and operations at a FINMA-regulated Swiss digital bank. Led the entire IT department (~40 people) across software engineering, infrastructure and support, delivering web and mobile platforms for trading, banking and crypto-enabled products.

- Designed and built a nearshore engineering centre in Portugal — owned the full lifecycle from vendor evaluation, site selection and onboarding to performance management and cultural integration with the Geneva headquarters.
- Established collaboration frameworks, tooling standards and agile ceremonies that enabled the nearshore team to operate as a seamless extension of the Swiss engineering function, not a separate outsourced unit.
- Defined the IT strategy and multi-year technology roadmap; presented to the Executive Committee and Board, translating technical decisions into business impact.
- Architected a real-time event-driven data platform connecting trading systems to compliance, marketing and finance — enabling live data flows across the bank's core functions.
- Initiated the cloud migration from on-premise to AWS, designing scalable cloud-native target architecture and introducing DevOps practices across the department.
- Ensured compliance with FINMA regulations, Swiss data residency requirements and business continuity planning (BCP/DRP) across all technology systems.

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Institutional Custody Platform

Led a distributed engineering organisation of 50 engineers across Geneva and San Francisco, building a regulated institutional custody platform for top-tier financial institutions.

- Managed a distributed engineering organisation across two countries — established delivery cadence, knowledge transfer and escalation frameworks that maintained quality and velocity across time zones.
- Scaled the organisation from 40 to 50 engineers — defined hiring strategy, structured interviews and levelling frameworks, continuously raising the bar on talent density.
- Restructured engineering into autonomous squads with clear domain ownership across mobile, backend and platform teams, increasing cross-functional delivery velocity.
- Led technical design in a cryptographic context — HSM integration, key management and secure transaction signing for institutional custody.
- Partnered with Product and executive leadership to translate business goals into an executable technical roadmap, balancing feature velocity with platform reliability and security.

NEARSHORE & DISTRIBUTED

- Nearshore setup (Portugal)
- Distributed teams
- Vendor governance
- Cross-border delivery
- Cultural alignment

TECHNOLOGY

- Cloud-native (AWS)
- Microservices
- Event-driven
- API-first
- CI/CD
- DevSecOps

REGULATORY

- FINMA
- GDPR
- ISO 27001
- Data residency
- BCP/DRP
- IT security audit

LEADERSHIP

- Manager of managers
- Team scaling (50+)
- Board reporting
- IT governance
- OKR frameworks
- Budget & roadmap

DOMAINS

- Private banking
- Digital banking
- Core banking
- Financial markets
- Blockchain custody

LANGUAGES

- French
- English
- Native
- C1

CTO / CPO – Partner

- Architected and delivered the full technology stack – cloud infrastructure, Elixir backend services and Flutter cross-platform mobile app – following TDD and API-first design principles.
- Drove reliability engineering to achieve more than 99.95% platform uptime; planned cybersecurity risk assessment and mitigation strategy.
- Owned the product roadmap end-to-end – user research, prioritised delivery cycles, and iterative shipping with a focus on quality.

Union Bancaire Privée

Nov 2018 – Jul 2020

Internal Auditor – IT & Security

- Conducted IT and banking security audits across the bank's technology estate, ensuring adherence to GDPR, FINMA and internal compliance frameworks.
- Uncovered a critical identity access management vulnerability through a thorough IAM audit; reported risk posture and remediation priorities directly to top management.
- Built data analytics tooling (R, Tableau) to increase audit coverage and credibility with stakeholders.

OTHER EXPERIENCES

Wonderful	Field CTO	Jan 2026 – Mar 2026
Scrypt	Head of Engineering	Nov 2025 – Dec 2025
Banque de Commerce et de Placements	Software Engineer – Core Banking	Nov 2017 – Oct 2018
SIX Swiss Exchange	Scala Developer – Financial Markets	Feb 2017 – Oct 2017
Glencore	Software Engineer	Aug 2016 – Jan 2017
Swissquote	Technical Lead – Consumer Fintech	Jan 2016 – Jul 2016
Rolex SA	Software Engineer (5 years)	Jan 2011 – Dec 2015
Axway	Software Engineer	Jan 2009 – Dec 2010

EDUCATION

MSc Informatics & Networking

EIGSI La Rochelle, 2009

Ethereum Blockstars

B9lab Certification, 2019

LOCATION

Geneva, Switzerland
