ENTERPRISE ARCHITECTURE · APPLICATION PORTFOLIO & TECH DEBT · AI-ENABLED PLATFORMS · GOVERNANCE & COMPLIANCE

IT leader with 15+ years in regulated environments and 7+ years directing engineering and architecture teams up to 50 people. Owns target-state architecture, multi-year roadmaps, application rationalisation and architecture governance — translating business and regulatory constraints into evidence-based technology choices, NFR trade-offs and AI-enabled platforms.

PROFESSIONAL EXPERIENCE

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Blockchain Custody Platform

- Led an organisation of up to 50 engineers across Geneva and San Francisco delivering a regulator-grade digital asset custody platform for institutional clients, including the implementation for HSBC Hong Kong.
- Owned target-state platform architecture (Scala, PostgreSQL, Kubernetes, Rust, React) and the cross-cutting NFR trade-offs across security, compliance, reliability and performance.
- Reorganised engineering into squads with clear domain ownership; coached technical leads and ran architecture reviews for cross-squad designs; sustained 90–96% team-satisfaction.
- Drove pragmatic AI adoption inside an institutional regulated platform — Claude Code, LLM developer copilots and AI-agent workflows embedded into engineering operations.

FlowBank SA

Aug 2022 – Aug 2023

Global Head of Technology — Executive Director

- Led the entire ~40-person IT department of a FINMA-regulated digital bank covering classical banking through to crypto-enabled products; defined the multi-year technology roadmap and annual budget presented to the Executive Committee.
- Defined the AWS target architecture, led the on-prem to AWS migration and drove application rationalisation across legacy and new platforms — initiated and led the Core Banking and CRM programmes, coordinating internal teams, integrators and external service providers.
- Architected a real-time data platform feeding compliance, finance and marketing — the cross-domain integration pattern directly applicable to R&D platforms such as LIMS, QMS and OT/IoT; embedded DevSecOps across the department.

Union Bancaire Privée

Nov 2018 – Jul 2020

Internal Auditor — IT & Security

- Headed IT and banking-security audits across the bank's full technology estate (GDPR and internal standards); reported directly to top management on risks, conformance and strategic actions — architecture-board oversight and exception handling at the bank scale.
- Uncovered a critical IAM bug affecting 0.5% of bank users through a thorough identity & access management audit.
- Led a team of two security specialists; built data-analytics tooling (R, Tableau) to widen audit coverage and risk visibility.

OTHER EXPERIENCES

Wonderful *Field CTO — Enterprise AI Platform*

Jan 2026 – Mar 2026

Script *Head of Engineering*

Nov 2025 – Dec 2025

Pictet Asset Management *Site Reliability Engineer — EKS / Terraform / Helm*

May 2021 – Dec 2021

Bazzile Technology SA *CTO / CPO — Mobile Real-Estate Platform*

Aug 2020 – Present

Banque de Commerce et de Placements *Technical Lead — Trade Finance*

Nov 2017 – Oct 2018

SIX Swiss Exchange *Scala Developer — Structured Products*

Feb 2017 – Oct 2017

Glencore International AG *Software Engineer — Trade Finance*

Aug 2016 – Jan 2017

Swissquote *Technical Lead — Forex*

Jan 2016 – Jul 2016

Rolex SA *Full-Stack Software Engineer*

Jan 2011 – Dec 2015

Axway Software *Software Engineer*

Jan 2009 – Dec 2010
