

Thibault Fouache

ICT Business Partner - regulated operations, digital transformation, governance and service-oriented technology leadership

Geneva, Switzerland +41 76 585 71 89 thibault.fouache@pm.me www.linkedin.com/in/thibault-gva github.com/RoyalMist

PROFESSIONAL SUMMARY

Geneva-based technology leader with CTO, Head of Engineering, Director Software Engineering and Global Head of Technology experience across regulated banking, fintech, cloud, data platforms, governance and operational service delivery. Built and sold a business, then led technology organizations up to 50 people; now applying systems thinking to high-trust ICT business partnering, process digitalization and stakeholder alignment. Strong fit for Hirslanden's Romandie mandate: representing clinical and business needs to central ICT, leading local teams, translating requirements into projects, and improving governance, service quality and operational transparency in regulated environments.

CORE COMPETENCIES

ICT Business Partnering

Romandie Stakeholder Leadership

Process Digitalization

ICT Governance

Requirements Engineering

Local Team Leadership

Project Portfolio Delivery

Service Orientation

Regulated Operations

French / English Communication

WORK EXPERIENCE

FlowBank

Aug 2022 - Aug 2023

Global Head of Technology, Executive Director - Geneva

- Led the technology department of a FINMA-regulated neobank, covering software engineering, data, infrastructure, service delivery and outsourced providers.
- Owned technology roadmap, annual budget, execution indicators and architecture direction for the Executive Committee.
- Built a viable technology vision to transform the bank into a fully digital institution, balancing regulatory, operational and business priorities.
- Created target architecture and a real-time data platform connecting trading, compliance, finance, marketing and quantitative teams.
- Initiated core projects including CRM and Core Banking; managed vendor renewals, external providers and capacity trade-offs.

Ripple / Metaco

Sep 2023 - Oct 2025

Director Software Engineering - Geneva

- Led up to 50 professionals across Geneva and San Francisco developing a regulated blockchain custody platform for institutional financial clients.
- Partnered with leadership, Product, Field Engineering and clients to translate business needs into technical and organizational strategy.
- Created a dedicated support and L3 squad to absorb client incidents, improve service ownership and protect roadmap delivery.
- Led multi-quarter initiatives with prioritization, risk anticipation, capacity planning and contingency planning.
- Established practices for monitoring, QA, release management, code/design reviews, process automation and technical debt control.

Bazzile Technology SA

Aug 2020 - Present

Chief Product & Technology Officer, Partner - Geneva

- Lead product and technology for a Swiss mobile application business across product strategy, architecture, backend, cloud, mobile delivery and AI-enabled product work.
- Built the first production version end-to-end with Elixir/Phoenix, PostgreSQL, APIs, mobile delivery and production infrastructure.
- Led a small multidisciplinary team across engineering, product and technical success, including hiring, coaching and external-provider coordination.
- Operated a Swiss-hosted production platform with 99.95% uptime through reliability, observability and incident practices.
- Planned cybersecurity risk assessment and mitigation work while balancing business needs and delivery speed.

SCRYPT

Nov 2025 - Dec 2025

Head of Engineering - Zurich

- Led engineering strategy and operations during a focused transformation mandate.
- Defined and delivered the complete product and engineering roadmap.
- Introduced Linear as the company-wide project management platform to improve structure, visibility and cross-functional accountability.
- Reorganized technology teams around delivery and L3 support squads, improving ownership and operational clarity.
- Drove practical AI adoption through Claude Enterprise integrated with Slack, Linear, email and calendars for executive and cross-functional work.

UBP - Union Bancaire Privée

Nov 2018 - Jul 2020

Internal Auditor - Geneva

- Led IT and banking security audits covering governance, risk, procedures, identity access management and GDPR-related controls.
- Prepared recommendations, discussed remediation with departments and leadership, and reported technology risk posture to senior management.
- Wrote audit reports in French and English; worked with IT auditors and security specialists across the bank's IT landscape.
- Used R and Tableau to turn raw data into audit insights; uncovered an application-role bug affecting 0.5% of bank users.

BCP Banque de Commerce et de Placements

Nov 2017 - Oct 2018

Software Engineer - Geneva

- Translated trade finance workflows and operational needs into delivered software with a team of two offshore developers.
- Set up development infrastructure and technical solutions by analyzing information needs, data flows and processes.
- Introduced DevOps practices through Agile methods, Kubernetes, Docker, GitLab and CI/CD pipelines.

Rolex

Jan 2011 - Dec 2015

Software Engineer - Geneva

- Built and maintained internal applications for after-sales and advertising departments.
- Captured user needs and wrote business and technical specifications for internal stakeholders.
- Managed an Identity Management project involving web development and infrastructure teams, including LDAP and Oracle Identity Manager.

SELECTED PROJECTS

Digital Bank Technology Transformation

- Led target architecture, AWS transition, roadmap, budget planning, CRM/Core Banking initiatives and data-platform design for a FINMA-regulated neobank.

Service Ownership and L3 Support Model

- Created a dedicated L3 support squad at Ripple / Metaco to absorb client incidents, clarify ownership and protect strategic roadmap delivery.

Banking Controls and Audit Analytics

- Led banking security audits, IAM reviews and remediation discussions; used analytics to make control findings actionable for senior management.

Operational Workflow and AI Enablement

- Implemented Claude Enterprise with Slack, Linear, email and calendar integrations at SCRYPT to support executive and cross-functional workflows.
