PRODUCT DELIVERY · CLOUD, DATA & AI · ENGINEERING LEADERSHIP & VENDOR GOVERNANCE

Technology leader with 15+ years building and running engineering organisations in financial services and digital businesses, including 7+ years in senior IT and technology-director roles with Executive Committee reporting. Owns the full IT function — software delivery, data platforms, cloud infrastructure, vendor management and budget.

PROFESSIONAL EXPERIENCE

Ripple

Sep 2023 – Oct 2025

Director of Software Engineering — Digital Asset Custody Platform

- Led an organisation of up to 50 engineers across Geneva and San Francisco delivering a digital asset custody platform for institutional financial clients; personally managed the implementation for HSBC Hong Kong.
- Owned the technology roadmap, hiring & levelling, and squad-based organisation; broke delivery down into structured workstreams with effort, cost and timeline commitments to executive management and key clients.
- Stood up a dedicated support squad to absorb client incidents and L3 requests, decoupling firefighting from the product roadmap and protecting delivery velocity; sustained 90–96% team-satisfaction scores.

FlowBank SA

Aug 2022 – Aug 2023

Global Head of Technology — Executive Director

- Led the whole IT department (~40 people) of a FINMA-regulated digital bank — covering software engineering, data engineering, infrastructure and outsourced services from classical banking through to crypto-enabled products.
- Prepared and owned the technology roadmap and annual budget presented to the Executive Committee; tracked spend, managed vendor renewals, and oversaw external service providers.
- Led the Core Banking, CRM and real-time data platform programmes feeding compliance, finance and marketing; drove the AWS migration and embedded modern CI/CD and DevSecOps practices across the department.

Bazzile Technology SA

Aug 2020 – Present

Chief Product & Technology Officer / Partner

- Own product and technology end-to-end for a mobile real-estate platform — defining the roadmap, translating business and commercial requirements into structured technical workstreams, and managing both the internal team and external providers.
- Selected and operate the cloud infrastructure, data pipelines and APIs powering the iOS and Android (Flutter) app; ran the cybersecurity risk assessment and mitigations.
- Built and structured a small engineering team (currently three developers) with clear ownership and minimal duplication; coordinated multiple external partners for design, mobile and specialised work.

OTHER EXPERIENCES

Wonderful	Field CTO — Enterprise AI Platform	Jan 2026 – Mar 2026
Script	Head of Engineering — Crypto Trading	Nov 2025 – Dec 2025
Pictet Asset Management	Site Reliability Engineer — Asset Management	May 2021 – Dec 2021

Swissquote	Technical Lead — Forex	Jan 2016 – Jul 2016
Rolux SA	Software Engineer — Luxury Watchmaking	Jan 2011 – Dec 2015
Axway Software	Software Engineer — Pharma Traceability	Jan 2009 – Dec 2010

IT LEADERSHIP

- Technology strategy
- Product delivery
- Budget ownership
- ExCo reporting
- Vendor & partner mgmt
- Organisational design

ARCHITECTURE & CLOUD

- AWS Azure
- Kubernetes
- Terraform / Helm
- CI/CD & DevSecOps
- Data platforms & APIs
- Cost optimisation

DATA & AI

- Voice pipelines
- Applied AI / LLMs
- AI agent workflows
- Analytics tooling

GOVERNANCE & RISK

- FINMA GDPR
- IT security audit IAM
- Business continuity
