PROFESSIONAL SUMMARY

CTO/CPO, Field CTO and engineering executive with product leadership experience across developer infrastructure, cloud platforms, PostgreSQL-backed products, regulated fintech, blockchain custody, data platforms and enterprise AI. Led organizations up to 50 people, managed managers and senior technical leaders, and owned roadmap, architecture, budget, customer evidence, delivery trade-offs and executive communication. Strong fit for Supabase Core Product Lead: shape 12-18 month product strategy across platform surfaces, translate engineering reality into product choices, coach PMs and technical leaders, and improve developer experience across databases, APIs, Auth, Storage, Edge Functions and Realtime-style products.

CORE COMPETENCIES

Product strategy Core platform roadmap Developer infrastructure PostgreSQL / APIs Cross-product prioritization
PM and leader coaching Customer evidence PRD / success metrics Async written operating model Cloud architecture
Reliability and observability Enterprise AI adoption Executive communication Open-source product adjacency

WORK EXPERIENCE

Bazzile Technology SA

Aug 2020 - Present

Chief Product & Technology Officer, Partner - Geneva, Switzerland

- Lead product and technology for a mobile application business, owning product strategy, roadmap trade-offs, architecture, backend, cloud, APIs, mobile delivery and AI-enabled product work.
- Built the first production version end-to-end with Elixir/Phoenix, PostgreSQL, APIs, mobile delivery and production infrastructure.
- Led a small multidisciplinary team across engineering, product and technical success, including hiring and coaching software engineers.
- Designed and industrialized a voice AI agent for real estate search using generative AI models and agent orchestration.
- Operated a Swiss-hosted production platform with 99.95% uptime through pragmatic reliability, observability and incident practices.
- Managed software engineers and external providers to move quickly while keeping architecture, security and operational risk explicit.

Ripple / Metaco

Sep 2023 - Oct 2025

Director Software Engineering - Geneva, Switzerland

- Led up to 50 professionals across Geneva and San Francisco developing a regulated blockchain custody platform for institutional financial clients.
- Managed managers, tech leads and engineering teams; supported hiring, levelling, coaching, career growth and independent ownership.
- Partnered with leadership, Product, Field Engineering and clients to shape technical strategy, delivery priorities, roadmap trade-offs and customer-specific outcomes.
- Drove architecture across multiple products and services, ensuring coherence, maintainability, security, scalability and operational excellence.
- Maintained close relationships with key institutional clients, including HSBC Hong Kong implementation needs, to turn customer evidence into execution priorities.
- Created a dedicated L3 support squad to absorb client incidents, improve escalation handling and protect roadmap delivery.
- Led multi-quarter initiatives with prioritization, risk anticipation, capacity planning, contingency planning, release quality and technical debt control.
- Achieved 90-96% team satisfaction through structured coaching, transparent ownership and squad autonomy.

FlowBank

Aug 2022 - Aug 2023

Global Head of Technology, Executive Director - Geneva, Switzerland

- Led a ~40-person technology department for a FINMA-regulated neobank across software engineering, data, infrastructure, service delivery and providers.
- Prepared and owned technology roadmap, annual budget, execution indicators and architecture direction for the Executive Committee.
- Created target architecture and a real-time data platform connecting trading, compliance, finance, marketing and quantitative teams.
- Initiated transition from on-premise infrastructure to AWS and brought DevSecOps culture to the department.
- Managed vendor renewals, providers and capacity trade-offs across regulatory, operational and business priorities.
- Initiated core projects including CRM and Core Banking.

SCRYPT

Nov 2025 - Dec 2025

Head of Engineering - Zurich, Switzerland

- Led engineering strategy and operations during a focused transformation mandate, defining and delivering the product and engineering roadmap.
- Introduced Linear as the company-wide project management platform to improve written structure, visibility, ownership and async execution.

- Drove company-wide AI adoption by implementing Claude Enterprise through Slack with Linear, email and calendars.
 - Created an always-on AI assistant for executive and cross-functional work across technology, sales and marketing.
 - Reorganized teams around delivery and L3 support squads to improve accountability and protect roadmap focus.
- Wonderful** Jan 2026 - Mar 2026
- Field CTO - Zurich, Switzerland**
- Drove client delivery and presales for an enterprise AI platform with Swiss enterprise prospects, including financial services and regulated organizations.
 - Presented AI agent workflows, RAG, voice AI, automation pipelines and integration patterns to C-level and technical audiences.
 - Translated AI platform capabilities into business value, adoption plans, architecture options and measurable use cases.

- Earlier engineering, platform and audit roles** 2009 - 2021
- Pictet, UBP, BCP, SIX, Glencore, Swissquote, Rolex, Axway - Switzerland / France**
- Built software and platforms across asset management, banking audits, commodity trade finance, structured products, commodity trading, Forex, IAM and enterprise applications.
 - Created EKS clusters, Helm charts and Terraform infrastructure at Pictet; introduced Kubernetes, Docker, GitLab and CI/CD pipelines at BCP.
 - Built APIs and enterprise systems with Scala, Java/Spring Boot, Angular, Node.js, Python, Kubernetes, CI/CD and database-backed application stacks.
 - Led IT/security audits at UBP covering governance, risk, IAM and GDPR controls, including one application-role bug affecting 0.5% of users.

SELECTED PROJECTS

Product and platform from zero to production. Built Bazzile's PostgreSQL-backed production platform, APIs, mobile delivery, cloud infrastructure and AI-enabled product work while owning product and technology strategy.

Regulated custody engineering organization. Led Ripple / Metaco engineering for institutional blockchain custody, scaling teams across Geneva and San Francisco while partnering with Product, Field Engineering and clients.

Digital bank technology transformation. Led FlowBank through target architecture, AWS migration, DevSecOps culture, roadmap, budget, Core Banking and real-time data platform enablement.

AI-first operating model. Implemented Claude Enterprise at SCRYPT with Slack, Linear, email and calendar integrations; used written tooling to improve cross-functional visibility and async execution.

EDUCATION

EIGSI La Rochelle
Master of Science, Computer Science
2003 - 2009

B9lab
Ethereum Blockstars, Blockchain - 2019

MongoDB University
Data Modeling / Warehousing and Database Administration

SKILLS

Product leadership: CTO/CPO, product strategy, roadmap, prioritization, customer evidence, success metrics, executive communication, PM-adjacent coaching

Developer infrastructure: PostgreSQL, APIs, AWS, Kubernetes, EKS, Terraform, Helm, CI/CD, DevSecOps, SRE, monitoring, observability, reliability

Engineering leadership: Director Software Engineering, Head of Engineering, manager-of-managers, hiring, levelling, coaching, team scaling, squad design

AI and platforms: LLMs, Claude Enterprise, RAG, agentic workflows, voice AI, workflow automation, regulated fintech, blockchain custody, core banking
