

Thibault Fouache

Chief Technology Officer - Secure AI-enabled platforms for regulated and sensitive-data environments

Geneva, Switzerland +41 76 585 71 89 thibault.fouache@pm.me www.linkedin.com/in/thibault-gva github.com/RoyalMist

PROFESSIONAL SUMMARY

CTO and engineering executive with experience leading regulated platforms, sensitive-data systems, cloud architecture, product development and AI adoption. Led organizations up to 50 people across fintech, blockchain custody, banking, data platforms and enterprise AI. Strong fit for digital-health CTO mandates that require secure architecture, privacy, compliance, API integrations, AI-driven product innovation and pragmatic scaling from early product to international platform.

CORE COMPETENCIES

- CTO Roadmap and Architecture
- Secure Sensitive-Data Platforms
- Privacy, GDPR and IAM Controls
- AI Product Innovation
- API and Integration Strategy
- Cloud Scalability
- Regulated Systems Governance
- Startup Technology Leadership

WORK EXPERIENCE

Wonderful Jan 2026 - Mar 2026

Field CTO - Switzerland

- Led technical demonstrations of AI agent workflows, RAG, voice AI, automation pipelines and integration patterns for C-level and technical audiences.
- Translated complex AI platform capabilities into business value, adoption plans and measurable use cases for Swiss enterprise prospects.
- Drove client delivery and presales engagements for regulated organizations, bridging product capabilities and customer needs.

Bazzile Technology SA Aug 2020 - Present

Chief Product & Technology Officer, Partner - Geneva

- Own product and technology for a Swiss mobile application business, covering product strategy, architecture, backend, cloud, mobile delivery and AI-enabled product work.
- Built the first production version end-to-end with Elixir/Phoenix, PostgreSQL, APIs, mobile delivery and production infrastructure.
- Designed and industrialized a voice AI agent using generative AI models and agent orchestration.
- Operated a Swiss-hosted production platform with 99.95% uptime through reliability, observability and incident practices.
- Planned cybersecurity risk assessment and mitigation work; managed engineers and external providers.

SCRYPT Nov 2025 - Dec 2025

Head of Engineering - Zurich

- Led engineering strategy and operations during a focused transformation mandate.
- Defined and delivered the complete product and engineering roadmap.
- Drove company-wide AI adoption by implementing Claude Enterprise integrated through Slack with Linear, email and calendars.
- Reorganized technology teams around delivery and L3 support squads, improving ownership and accountability.

Ripple / Metaco Sep 2023 - Oct 2025

Director Software Engineering - Geneva

- Led up to 50 professionals across Geneva and San Francisco developing a regulated blockchain custody platform for institutional financial clients.
- Defined and drove architecture across products and services, ensuring coherence, security, scalability and operational excellence.
- Maintained close relationships with institutional clients, including HSBC Hong Kong implementation support.
- Established quality, monitoring, code/design reviews, technical debt control, testing strategy, QA, release management and L3 support practices.

FlowBank Aug 2022 - Aug 2023

Global Head of Technology, Executive Director - Geneva

- Led a FINMA-regulated neobank technology department of approximately 40 people across software engineering, data, infrastructure, service delivery and providers.
- Owned technology roadmap, annual budget and execution indicators for the Executive Committee.
- Created target architecture and a real-time data platform connecting trading, compliance, finance, marketing and quantitative teams.
- Initiated the transition from on-premise infrastructure to AWS and brought DevSecOps culture to the department.

Internal Auditor - Geneva

- Led IT and banking security audits covering governance, risk, procedures and GDPR-related controls.
- Reported technology risk posture, control gaps and remediation plans to senior management.
- Uncovered an application-role bug affecting 0.5% of bank users during an identity access management audit.

SELECTED PROJECTS

Enterprise AI Operating System

- Implemented Claude Enterprise at SCRYPT with Slack, Linear, email and calendar integrations for executive and cross-functional workflows.

Blockchain Custody Engineering Organization

- Led architecture and engineering for a regulated institutional custody platform; scaled teams across Geneva and San Francisco and supported client delivery.

Digital Bank Technology Transformation

- Led target architecture, AWS migration, DevSecOps, data platform and technology roadmap for a FINMA-regulated neobank.

Cloud and DevOps Platform Work

- Built EKS clusters, Helm deployment structures and Terraform infrastructure at Pictet; established Kubernetes, Docker, GitLab and CI/CD pipelines at BCP.

EDUCATION

EIGSI La Rochelle

Master of Science, Computer Science

SKILLS

AWS, Kubernetes, EKS, Terraform, Helm, CI/CD, DevSecOps, SRE, PostgreSQL, Elixir/Phoenix, React, Java, Scala, Python, Go, Node.js, LLMs, RAG, voice AI, agentic workflows, GDPR, IAM, IT audit, cybersecurity risk assessment.
