Celonis Hiring Team
Enterprise Architect Director

Dear Celonis Hiring Team,

I am applying for the Enterprise Architect Director role because it sits exactly where my recent work has been strongest: executive-facing technology leadership, enterprise AI adoption, architecture strategy, and the translation of technical options into measurable business outcomes.

As Field CTO at Wonderful, I led enterprise AI platform discussions with Swiss prospects, including financial services and regulated organizations. I presented AI agent workflows, RAG, voice AI, automation pipelines, and integration patterns to C-level and technical audiences, then translated those capabilities into adoption plans and measurable use cases. That maps directly to your need for a leader who can act as an executive sponsor, present strategic visions to customer executives, and help teams connect architecture with business value.

Before that, I led engineering organizations in high-trust environments. At Ripple / Metaco, I managed up to 50 people across Geneva and San Francisco building a regulated blockchain custody platform for institutional clients. I partnered with Product, Field Engineering, security, clients, and leadership, and created an L3 support squad to improve technical escalation and protect roadmap delivery. At FlowBank, I owned the technology roadmap, budget, target architecture, AWS transition, and executive indicators for a FINMA-regulated neobank.

Celonis' focus on Process Intelligence, Enterprise AI, data architecture, integration, cloud, security, and customer value is compelling because it treats AI as an operating-system problem, not a demo problem. My strongest contribution would be to lead architects who can move between board-level outcomes and implementation reality: data models, APIs, SaaS ecosystems, cybersecurity posture, legacy constraints, and the organizational work needed to make enterprise modernization stick.

I am based in Geneva with a Swiss work permit C. I speak French natively and English professionally, and I am comfortable operating with international enterprise stakeholders. I would welcome a conversation on the team scope, Switzerland working model, and the outcomes Celonis expects from this role in the first six months.

Best regards,
Thibault Fouache
